

## Ooma AirDial for High Volume and Multi-Page Faxing

Landline phone companies, free from Federal Communications Commission (FCC) constraints, are passing price increases onto the dwindling number of customers that still rely on Plain Old Telephone Service (POTS).

In addition to raising prices, landline companies are also reducing network maintenance and making it more difficult for their customers to secure new POTS lines.

This impacts many legacy analog devices including fax machines that remain connected to the POTS network.

Some businesses attempt to use Analog Telephone Adapters (ATAs) or digital fax but both solutions come with limitations. ATAs may need adjusted settings like codec selection, packet size or jitter to improve fax reliability particularly with older or specialized fax machines.

Digital fax solutions typically involve subscription fees so costs can quickly increase where there is high volume faxing. Like ATA's, digital fax solutions may also not be compatible with older fax equipment.

Ooma AirDial® is the all-in-one POTS replacement solution that enables organizations to save money and keep using existing fax hardware by migrating from analog phone lines to a nationwide wireless network.

### Key Benefits

**High volume and multi-page faxing** – Ideal for healthcare providers, legal firms, government offices, financial institutions, real estate agencies and insurance companies that use fax machines for transmitting documents, forms, contracts and more.

**Cost savings** – Enjoy immediate cost savings on monthly phone bills.

**All-inclusive solution** – Get everything you need from one provider - hardware, data, and phone service with no monthly rate “surprises”.

**Compatibility** – Works out-of-the-box with new, older, or specialized faxing hardware.

**Simple migration** – Provides a quick, easy migration and organizations can keep using existing fax systems.

**Keep faxing during power outages** – Backup battery maintains service for 16 hours which can be extended to more than 24 hours using an optional external battery accessory.

**Remote Device Management** – Manage all locations and devices using intuitive web portal. Get SMS and email alerts should outages occur or when backup batteries are low.

**HIPAA compliance** – Can help organizations remain in compliance with the Health Insurance Portability and Accountability Act (HIPAA) since sensitive information is encrypted and never traverses the public internet.

**Support** – Access 24x7x365 North American-based support for questions or troubleshooting assistance.

Start saving money and keep using existing faxing hardware by migrating to the leading all-in-one POTS replacement solution – Ooma AirDial.
